

PROPOSED SOLUTION

Date	7 November 2022
Team ID	PNT2022TMID20781
Project Name	AI Powered Nutrition Analyst for Fitness Enthusiasts.

S.No	Parameter	Description
1.	Problem Statement (Problem to be solved)	Some peoples find it difficult to learn new apps in this ever-expanding digital environment, and people nowadays people have been affected by illness. Here are tips about nutrition for the users.
2.	Idea / Solution description	Create a basic, easy-to-use app so that users optimize health and performance by personalized nutrition plan and learn how to optimize the diet for greater benefits.
3.	Novelty / Uniqueness	My research began with a series of inquiries directed at a variety of people in order to have a better understanding of their issues and give tips on workout to improve the fitness.
4.	Social Impact / Customer Satisfaction	I constructed the app based on the research findings from the user interview. It would be crucial to the rest of the design process.
5.	Business Model (Revenue Model)	By using the model, we can collect some basic physical information about the person that helps us in showing relevant and profitable advertisements.
6.	Scalability of the Solution	As the model is integrated with cloud software,we can update the user experience without reinstalling a model
